# WEATHER SYNOPSIS BY REGION

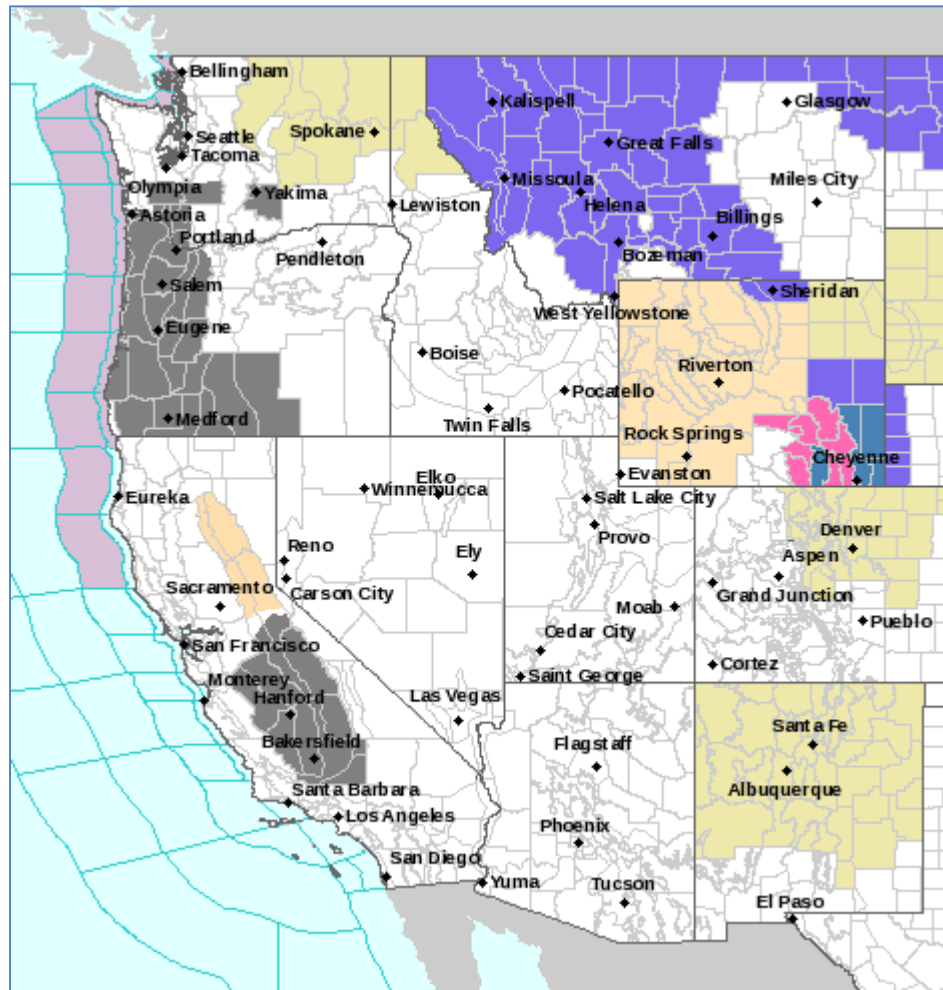

## **NORTHERN CALIFORNIA**

- Very dry conditions to continue through Tuesday, with areas of light to moderate night/morning N-NE winds.
- High pressure will continue to produce warm, dry conditions through Tuesday.
- Night/morning N-NE gusts to 15-25 mph and locally higher in wind-prone spots from the western Cascade-Sierra slopes to the Coast Range through Tuesday, slightly higher Sunday night and Monday. Light up-slope/up-valley winds during afternoons.
- Afternoon relative humidity (RH) will be low (5-15%) most afternoons this week with poor overnight recovery (10-25%) in many areas, particularly mid and upper slopes. Some valley locations that have been very dry may see RH will increase in a few days to afternoon minimums of 15-20% and overnight recoveries of 25-35%.
- Afternoon high temperatures will continue 5-10 degrees above normal. Warmest inland areas mostly in the 70s. Overnight lows will be pretty close to seasonal values, and overnight frost/freezing conditions are likely to become a bit more widespread.
- Onshore flow, deeper marine layer and higher RH developing Wednesday. Widespread rain and high elevation snow becoming more likely Thanksgiving Day.

## **SOUTHERN CALIFORNIA**

- A ridge of high pressure will sit over the West Coast through Monday. A series of Pacific troughs will move into the West Coast starting Tuesday of next week.
- There will be widespread single digit minimum humidity through today and then minimum humidity will increase into the teens this weekend through Monday. Nighttime humidity recovery will increase today through Monday.
- Temperatures will be near to a little above normal through Monday, with mid 50s to mid 60s across the mountains and 70s to low 80s in the valleys.
- Temperatures will cool to a little below normal and humidity will become fairly high Tuesday through the middle of next week.
